

SAFETY HELMET · TYPE 2

SCA 1205XR

Ventilated polycarbonate helmet for disaster response 0.57 KG · 52–64 CM · KFI

OVERVIEW

Robust head protection in disaster situations, without direct exposure to fire.

The SCA 1205XR Type 2 safety helmet protects the wearer's head in various disaster situations. A ventilated polycarbonate shell with slide-switch air holes minimises heat stress, and as the lightest model in the range it reduces the load on the neck during long operations.

CERTIFIED

Korea Fire Institute (KFI)

Firefighting safety helmet

FUNCTIONS / FEATURES

06 ITEMS

01

Air Ventilation System

Ventilation minimises heat stress during extended disaster-response work.

03

Polycarbonate Shell

Strong durability against impacts and falling objects.

05

Optional Goggles

Protective goggles available as an option.

02

Slide-switch Air Holes

Air holes can be opened or closed with the slide switch on the top of the shell.

04

Lightest Model

The lightest helmet in the range, reducing the load imposed on the neck.

06
